

Exercise and Health

锻炼与健康

Date: 2026-05-10 | Level: A1-A2

English Class Course Material

Learning Goals

学习目标

- Understand key vocabulary about exercise types and nutrition

掌握运动类型和营养相关的核心词汇

- Describe exercise habits and health benefits in simple English

能用简单英语描述运动习惯和健康益处

- Compare morning vs. evening workout pros and cons

能比较早晚锻炼的优缺点

- Create a basic weekly workout plan

能制定基本的每周锻炼计划

- Learn the three main nutrients: protein, carbs, and fats

了解三大营养素：蛋白质、碳水化合物和脂肪

Warm-up Questions

课前讨论

1. What do you usually do in your free time?

你空闲时间通常做什么？

2. Do you think exercise is important? Why?

你觉得运动重要吗？为什么？

3. How often do you exercise every week?

你每周运动几次？

4. Do you prefer morning or evening exercise?

你更喜欢早上还是晚上锻炼？

Key Vocabulary

核心词汇

Word	Pron.	POS	Chinese	Example
exercise	<i>/ˈeksəsaɪz/</i>	n./v.	锻炼	Exercise is important for health. I exercise three times a week.
cardio	<i>/ˈkɑːrdioʊ/</i>	n.	有氧运动	Running and swimming are cardio. Cardio is good for your heart.
hypertrophy	<i>/haɪˈpɜːrtroʊfi/</i>	n.	增肌	Hypertrophy training builds muscle. Muscle hypertrophy makes you stronger.
heart rate	<i>/hɑːrt reɪt/</i>	n.	心率	Your heart rate goes up during cardio. A normal heart rate is about 60-100 bpm.
protein	<i>/ˈproʊtiːn/</i>	n.	蛋白质	Meat and tofu have high protein. Protein helps repair your muscles.
carbs	<i>/kɑːrbz/</i>	n.	碳水化合物	Rice and bread are carbs. Carbs give you energy for exercise.

fats	/fæts/	n.	脂肪	Fats help control hormones. Some fats are healthy, like olive oil.
glycogen	/'glaiʔədʒən/	n.	糖原	Carbs give you glycogen for energy. Your body stores glycogen in muscles.
hormone	/'hɔ:rmoun/	n.	荷尔蒙	Fats control hormone levels. Hormones affect your mood and growth.
stress	/stres/	n.	压力	Exercise can release stress. Too much stress is bad for health.
leisure time	/'li:ʒər/	n.	空闲时间	What do you do in your leisure time? I read books in my leisure time.
kettle bell	/'ketl bel/	n.	壶铃	A kettle bell is a kind of weight. You can do full-body training with a kettle bell.
calorie	/'kæləri/	n.	卡路里	Fast food has too many calories. You burn calories when you exercise.
vitamin	/'vaɪtəmin/	n.	维生素	Fruits and vegetables have many vitamins. Your body needs fats to absorb vitamins.
dairy	/'deri/	n.	乳制品	Milk and yogurt are dairy products. Dairy is a good source of protein.
pushup	/'pʊʃʌp/	n.	俯卧撑	Pushups are a basic hypertrophy exercise. I can do 20 pushups in a row.

Additional Example Sentences

扩展例句

exercise /'eksəsaɪz/ n./v.

锻炼

Walking is also a kind of exercise. | She exercises every morning before work.

散步也是一种锻炼。| 她每天上班前锻炼。

cardio /'kɑ:rdiʊ/ n.

有氧运动

Skipping rope is a great cardio workout. | How much cardio do you do each week?

跳绳是很好的有氧运动。| 你每周做多少有氧运动？

hypertrophy /haɪ'pɜ:trəfi/ n.

增肌

For hypertrophy, you need to lift heavy. | Hypertrophy happens when you push your limits.

增肌需要举重物。| 当你突破极限时，增肌才会发生。

heart rate /hɑ:rt reɪt/ n.

心率

Check your heart rate after running. | A lower resting heart rate means better fitness.

跑步后检查你的心率。| 静息心率越低说明身体越好。

protein /'prəʊti:n/ n.

蛋白质

Protein is like Lego for your body. | Eggs and fish are rich in protein.

蛋白质就像身体的乐高积木。| 鸡蛋和鱼富含蛋白质。

carbs /kɑ:rbz/ n.

碳水化合物

Carbs give you glycogen for energy. | Noodles and rice are common carbs in China.

碳水给你糖原提供能量。| 面条和米饭是中国常见的碳水食物。

fats /fæts/ n.

脂肪

Without fats, your body cannot control hormones well. | Avocados have healthy fats.

没有脂肪，身体无法良好调节荷尔蒙。| 牛油果含有健康脂肪。

glycogen /'glʌkədʒən/ n.

糖原

Glycogen is basically simple sugar in your body. | You need carbs to refill glycogen after exercise.

糖原基本上是体内的简单糖分。| 运动后需要碳水来补充糖原。

hormone /'hɔːrməʊn/ n.

荷尔蒙

Men and women have different hormones. | Hormones control many things in your body.

男性和女性有不同的荷尔蒙。| 荷尔蒙控制身体的很多功能。

stress /stres/ n.

压力

Exercise is a great way to release stress. | Work can cause a lot of stress.

运动是释放压力的好方法。| 工作会带来很多压力。

leisure time /'liːʒər/ n.

空闲时间

I play guitar in my leisure time. | How much leisure time do you have each week?

我空闲时间弹吉他。| 你每周有多少空闲时间？

kettle bell /'ketl bel/ n.

壶铃

Kettle bell training can be both cardio and hypertrophy. | You can do many exercises with one kettle bell.

壶铃训练可以同时是有氧和增肌。| 一个壶铃可以做很多种练习。

calorie /'kæləri/ n.

卡路里

A hamburger has about 500 calories. | You should watch your calorie intake.

一个汉堡大约500卡路里。| 你应该注意卡路里摄入。

vitamin /'vaɪtəɪn/ n.

维生素

Vitamin C helps your immune system. | Some vitamins need fats to be absorbed.

维生素C有助于免疫系统。| 有些维生素需要脂肪才能被吸收。

dairy /'deri/ n.

乳制品

Milk, cheese, and yogurt are dairy. | Dairy provides calcium and protein.

牛奶、奶酪和酸奶是乳制品。| 乳制品提供钙和蛋白质。

pushup /'pʊʃʌp/ n.

俯卧撑

If you can do 10 pushups, try 11 next time. | Pushups are good for chest and arms.

如果你能做10个俯卧撑，下次试11个。| 俯卧撑对胸肌和手臂好。

Useful Expressions

实用表达

Talking about exercise habits

谈论运动习惯

A:

How often do you exercise?

你多久锻炼一次？

B:

I try to exercise three times a week.

我尽量每周运动三次。

A:

What kind of exercise do you usually do?

你通常做什么运动？

B:

I usually go running or swimming for cardio.

我通常跑步或游泳做有氧运动。

A:

Do you exercise in your leisure time?

你空闲时间会锻炼吗？

B:

Yes, I like hiking and camping on weekends.

是的，我周末喜欢徒步和露营。

Describing health benefits

描述健康益处

A:

What are the benefits of exercise?

运动有什么好处？

B:

It can make us healthier and release stress.

它能让我们更健康，还能释放压力。

A:

Why is cardio good for you?

为什么有氧运动对你好？

B:

Cardio strengthens your heart and lowers your resting heart rate.

有氧运动强化心脏，降低静息心率。

A:

What about hypertrophy training?

增肌训练呢？

B:

It builds muscle and makes you stronger. It also burns calories.

它长肌肉让你更强壮，还能燃烧卡路里。

Comparing morning vs. evening workouts

比较早晚锻炼

A:

What are some pros of exercising in the evening?

晚上锻炼有什么好处？

B:

We have more time after work. But it can be crowded.

下班后时间更多。但可能会很挤。

A:

What about the morning?

早上呢？

B:

The fresh air wakes up your body. It causes alertness, so you don't need coffee.

新鲜空气让身体醒过来。运动能提神，不需要咖啡。

A:

What's a con of morning exercise?

早上锻炼的缺点是什么？

B:

The biggest con is you can't get up early. Also, your muscles need time to warm up.

最大的缺点是起不来。而且肌肉需要时间热身。

Giving fitness advice

给健身建议

A:

I want to start exercising. What should I do?

我想开始锻炼，应该怎么做？

B:

Start with 15 minutes of cardio every day. Walking is fine!

从每天15分钟有氧开始。散步就行！

A:

Should I do cardio or hypertrophy first?

我应该先做有氧还是增肌？

B:

It's better to do hypertrophy first, then cardio. You need power for lifting heavy.

最好先做增肌，后做有氧。举重需要力量。

A:

What about diet?

饮食呢？

B:

Eat more protein for muscle, carbs for energy, and some fats for hormones.

多吃蛋白质长肌肉，碳水给能量，适量脂肪调节荷尔蒙。

Dialogue / Reading

对话与阅读

Warm-up: Talking about hobbies

课前：谈论爱好

Teacher:

What hobbies does anybody have? Like during free time, what do you do?

大家有什么爱好？空闲时间做什么？

Student A:

I usually play electric guitar in my leisure time.

我空闲时间通常弹电吉他。

Teacher:

Leisure time, OK. How long have you been playing?

空闲时间，好的。你弹了多久了？

Student A:

For two years.

两年了。

Student B:

After work, maybe I like traveling, maybe go climbing.

下班后，我喜欢旅行，可能去爬山。

Teacher:

Traveling you cannot do every day, right? What about during workdays?

旅行不能每天都做吧？工作日呢？

Student B:

On weekends I go climbing. On workdays, I walk my pet dog.

周末去爬山。工作日遛狗。

Student C:

In my free time, I read books and do sports, like swimming and camping.

空闲时间我读书做运动，比如游泳和露营。

Student D:

I often watch TikTok and e-sports on my phone. I also watch movies once a week.

我经常看抖音和电竞。每周还看一次电影。

Types of Exercise: Cardio vs. Hypertrophy

运动类型：有氧 vs 增肌

Teacher:

There are many different kinds of exercises. Running, swimming, dancing...

有很多种运动。跑步、游泳、跳舞……

Teacher:

Cardio actually comes from a Greek word. It means heart. So anything you do that's cardio is good for the heart.

Cardio 来自希腊语，意思是心脏。所以有氧运动对心脏好。

Teacher:

And also there is another kind of training. It's good for muscles. That one is called Hypertrophy Training.

还有另一种训练，对肌肉好。叫做增肌训练。

Teacher:

For hypertrophy training, what we need to do is lift heavy. You need to do something your body cannot do.

增肌训练需要举重物。你需要做身体做不到的事情。

Teacher:

Hypertrophy only happens when you push your limits. For example, if you can do 10 pushups, try 11 next time.

增肌只在突破极限时发生。比如你能做10个俯卧撑，下次试11个。

Teacher:

If pushups become too easy, add weight. That's how you keep growing muscle.

如果俯卧撑太简单了，就加重。这样才能持续长肌肉。

Morning vs. Evening Workout

早晚锻炼对比

Teacher:

What are some pros of going to the gym in the evening?

晚上去健身房有什么好处？

Student:

After work, have enough time.

下班后时间充足。

Student:

Also, you have more protein in your body from eating during the day.

而且白天吃了东西，体内蛋白质更多。

Teacher:

What about cons of evening exercise?

晚上锻炼的缺点呢？

Student:

It can be crowded in the evening. Too many people.

晚上可能会很挤。人太多。

Student:

If you exercise too late, you may have trouble sleeping.

如果锻炼太晚，可能睡不着。

Student:

After a hard day at work, you can be too tired to lift heavy.
工作一天后太累了，举不动重物。

Teacher:

What about in the morning?
那早上呢？

Student:

The fresh air. We can wake up our body.
空气新鲜。能让身体醒过来。

Teacher:

Why need coffee when exercise can cause alertness?
运动能提神，干嘛还需要咖啡？

Student:

A con is you can't get up early.
缺点是起不来。

Student:

Also, your muscles need time to warm up. If you just wake up and go, you can have injury.
而且肌肉需要时间热身。刚醒就去练，容易受伤。

Teacher:

So after knowing all the pros and cons, who still chooses evening? Who chooses morning?
知道了所有优缺点后，谁还选晚上？谁选早上？

Students:

Morning! Because it makes us feel happy, saves time, and gyms are less crowded.
早上！因为让人开心、省时间、健身房也不挤。

Diet and Nutrition: Protein, Carbs, Fats

饮食与营养：蛋白质、碳水、脂肪

Teacher:

Training is not complete without diet. We have three things: exercise, sleep and diet.
没有饮食的训练是不完整的。三件事：运动、睡眠和饮食。

Teacher:

Protein makes you grow, build muscle, help you fix broken things.
蛋白质让你生长、长肌肉、修复损伤。

Teacher:

Protein is like Lego. One piece goes out, a Lego piece goes in. It can be muscle, can be skin.
蛋白质像乐高。一块出去，一块进来。可以是肌肉，也可以是皮肤。

Teacher:

Carbs give you glycogen. Glycogen is basically simple sugar in your body. You have no glycogen, you're dead.
碳水给你糖原。糖原基本上是体内的简单糖分。没有糖原，人就完了。

Teacher:

Fats control hormone levels. If you don't have fats, your body cannot control that well.
脂肪控制荷尔蒙水平。没有脂肪，身体无法良好调节。

Teacher:

Also, some vitamins need fats to be absorbed. Without fats, your body just doesn't use them.
而且有些维生素需要脂肪才能被吸收。没有脂肪，身体就用不了。

Teacher:

You can find protein in meat, tofu, eggs, and dairy like milk and yogurt.
蛋白质可以从肉、豆腐、鸡蛋和乳制品如牛奶酸奶中获取。

Teacher:

Carbs are in rice, noodles, and bread. Fats are in oils, nuts, and avocados.
碳水在米饭、面条和面包里。脂肪在油、坚果和牛油果里。

Guided Practice

引导练习

Exercise 1: Fill in the blanks

练习1：填空

Complete the sentences with the correct word from the vocabulary list.

1. Running and swimming are types of _____. (). _____
2. _____ training is good for growing muscles (). _____
3. Your _____ goes up when you do cardio (). _____
4. Meat, tofu, and dairy are high in _____. (). _____
5. Rice and bread give you _____ for energy (). _____

Exercise 2: True or False

练习2：判断对错

Write T (True) or F (False) for each statement.

1. Cardio is bad for your heart. () _____
2. Hypertrophy training means lifting heavy weights. () _____
3. You need at least 2 hours of exercise per day to be healthy. () _____
4. Fats help control hormone levels and absorb vitamins. () _____
5. It's better to do cardio before hypertrophy training. () _____

Exercise 3: Match the nutrient to function

练习3：匹配营养素与功能

Match each nutrient to its function.

1. Protein 2. Carbs 3. Fats

A. Gives you glycogen for energy → _____

B. Builds muscle and repairs tissue → _____

C. Controls hormone levels and helps absorb vitamins → _____

Speaking Task

口语任务

Task 1: Describe your exercise routine

任务1：描述你的运动习惯

Tell your partner about your weekly exercise routine. Include:

- What type of exercise you do
- How often you exercise
- When you prefer to exercise (morning/evening) and why
- One thing you want to change about your routine

Task 2: Design a workout plan

任务2：设计锻炼计划

You have 3 days per week (Monday, Wednesday, Friday), 1 hour each day.

Design a workout plan and explain your choices to the class.

- ▶ Remember: Do hypertrophy training first, then cardio.
- ▶ Example: 30 min hypertrophy (pushups, kettle bell) + 30 min cardio (running, swimming)

Task 3: Role-play - Fitness trainer and beginner

任务3：角色扮演 - 健身教练与新手

Student A: You are a fitness trainer. Give advice to a beginner.

Student B: You are a beginner who wants to start exercising.

Use vocabulary from this lesson: cardio, hypertrophy, protein, heart rate, calorie, pushup, etc.

- ▶ Trainer tips: Ask about their goals, suggest a simple plan, explain diet basics.

Review

复盘总结

Key Takeaways

核心要点

- Cardio = good for the heart (running, swimming, walking)
有氧运动 = 对心脏好 (跑步、游泳、散步)
- Hypertrophy = good for muscles (lift heavy, push your limits)
增肌训练 = 对肌肉好 (举重、突破极限)
- 15 minutes of moderate exercise per day is enough for health
每天15分钟中等强度运动就够保持健康
- Do hypertrophy first, then cardio (you need power for lifting)
先做增肌，后做有氧 (举重需要力量)
- Three nutrients: protein (muscle), carbs (energy), fats (hormones)
三大营养素：蛋白质 (肌肉)、碳水 (能量)、脂肪 (荷尔蒙)

Self-Check

自我检测

1. Can you explain the difference between cardio and hypertrophy training?

你能解释有氧运动和增肌训练的区别吗？

2. Can you name three nutrients and their functions?

你能说出三种营养素及其功能吗？

3. Can you describe the pros and cons of morning vs. evening exercise?

你能描述早晚锻炼的优缺点吗？

Homework

课后练习

Writing

写作练习

Write a short paragraph (5-8 sentences) about your exercise habits and health goals.

► Use at least 5 vocabulary words from this lesson.

Vocabulary Review

词汇复习

Review all vocabulary words. Write a sentence for each of these words:

- cardio
- hypertrophy
- protein
- carbs
- heart rate
- stress

Listening Practice

听力练习

Listen to the class recording again. Write down 3 new expressions you learned.

Answer Key (Exercises 1-3)

练习答案

Exercise 1: 1. cardio 2. Hypertrophy 3. heart rate 4. protein 5. carbs

Exercise 2: 1. F 2. T 3. F 4. T 5. F

Exercise 3: A-2 B-1 C-3
